

CLEAN FIGHT

Disinfectant

Organic, Nontoxic, and Powerful Disinfectant for COVID-19 Protection

Clean Fight Disinfectant is an organic, nontoxic, and powerful disinfectant that is safe to use on all surface types. Clean Fight is hospital grade and EPA approved to kill all labeled pathogens, including: COVID-19, MRSA, C.Diff, Noro and Rhino virus, and many other common virus and bacterial pathogens. It is listed on the EPA's N list of disinfectants for use against COVID-19 (SARS-CoV-2).

Clean Fight Disinfectant is an activated HOCL solution that is generated under electrochemical conditions using a combination of water, salt and electricity. This effective disinfectant has a near neutral pH level. Nontoxic and safe for people, plants and pets. Safe to apply around skin and eyes.

What is HOCL?

HOCL is the perfect weapon to fight germs. It is a naturally occurring chemical that is produced by our own white blood cells to fight off pathogens. It oxidizes viruses and ruptures the cell wall of bacterial pathogens. HOCL is one of the only agents that is both nontoxic to the body, while also being lethal to dangerous bacteria and viruses.

This solution has been used for over 100 years. In the early 1900's during the World Wars, HOCL was used for disinfecting medical equipment and dressing wounds. However, until recently, HOCL would only remain stable for 90 minutes before reverting back to salt water. The Clean Fight version of HOCL is generated under highly specific electrochemical conditions and now has a minimum shelf life of 30 days. HOCL is approximately 80 times more effective than OCL-. Uncharged HOCL is more effective in penetrating viruses and the cell walls of pathogens.

Clean Fight Benefits

- EPA Registered and on List N Disinfectants against the virus that causes COVID-19
- 100% Natural, Nontoxic and Allergen-Free
- No Harsh Chemicals, No Alcohol, No Bleach
- Kills 99.9% of Bacteria and Viruses
- Disinfects 200 to 300 times better than bleach
- No Rinse Required, even on food contact surfaces
- Produced at a near neutral pH level of 6.5 and contains 500 ppm free available chlorine (FAC)

Company Overview

Clean Fight, LLC is based in Tulsa, Oklahoma and is owned and operated by Professional Firefighters. We are passionate about protecting others, and created this company to help the public stay prepared for the hazardous world we live in. Firefighters have used the HOCL for disinfecting their homes, businesses, fire stations and livestock operations for over ten years.

Clean Fight Natural Disinfectant is ideal for professional, school and home use.
Protect yourself and your family with this Firefighter approved product.

Directions for Use

Disinfect Hard, Non-Porous Surfaces: For visibly soiled areas, a preliminary cleaning is required. Apply Clean Fight Disinfectant at 500 ppm FAC to hard, non-porous surfaces with a cloth, mop or sponge. Treated surfaces must remain wet for 10 minutes. Allow surfaces to air dry. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre- clean or decontaminate critical or semi-critical devices prior to sterilization or high-level disinfection.

Disinfect Water Sensitive Equipment, Hard, Non-Porous Surfaces: Completely power off electrical equipment prior to treatment. Pre-clean soils from external surfaces to be disinfected with a clean paper towel, cloth, microfiber, or sponge, which may be dry or slightly wetted with this product. Carefully apply Clean Fight Disinfectant using a cloth or spray device so that only enough solution is applied to keep the surface thoroughly wet for 10 minutes. Avoid over soaking and prevent pooled or puddled areas. Treated surfaces must remain wet for 10 minutes. Reapply as necessary to keep wet for 10 minutes. Do not rinse. Allow surfaces to air dry. If hazy film or streaks appear after 10 minutes, wipe clean with a dry or slightly damp clean paper towel, cloth, or microfiber. Do not restore power to electronic equipment until thoroughly dry.

Clean Non-Porous Surfaces – and/or – Floors: Apply Clean Fight Disinfectant to soiled area or surface with a cloth, wipe, mop, sponge, spray, or immersion, then wipe or scrub clean. This product can be used to clean various stains and organics including the following: bathtub ring, beverage stains, blood, body oils, coffee (stains), dead skin, dirt, fecal matter, fingerprints, food residue(s), fruit (stains), grease, laboratory stains, mildew stains, mold stains, (other) common soils – and/or – stains, (other) organic matter, pet odor, rust, tea (stains), urine (stains), vomit (stains).

Clean, and Deodorize Toilet Bowls – and/or – Urinals – and/or – Bidets: Remove heavy soil prior to disinfection. Empty toilet bowl or urinal and liberally apply Clean Fight Disinfectant to exposed surfaces including under the rim with a cloth, mop, sponge or spray device until the surface is thoroughly wet.

To Deodorize: Spray until thoroughly wet. Let stand for appropriate time. Then wipe. For visibly soiled areas, a preliminary cleaning is required.

To Clean Non-Porous Glass – and/or – Mirror(s) – and/or – Window(s): Dilute this product 1:19 to 1:4 with water to prepare a 25-100 ppm available chlorine glass cleaner solution. If desired, use chlorine test strips to [determine exact available chlorine concentration. Apply glass cleaner solution with paper towel, cloth, mop, sponge, or spray to soiled area or surface, then wipe, squeegee, or scrub clean. Residual wetness may be removed with paper towel or cloth or just allow surfaces to air dry. If hazy film or streaks appear after drying, wipe clean with a dry or slightly damp clean paper towel, cloth, or microfiber.

Clean Fight is used by the following customers:

Emergency Services (Fire Departments, Police Departments and EMS)

Disinfecting vehicles, equipment, clothing, facilities and appliances

Cities, Towns and Counties

Disinfecting city halls, courthouses, security entrances, hospitals, rest homes, prisons, etc.

Public Schools

Disinfecting cafeterias, tables/chairs, desks, bathrooms, hallways, classrooms, gyms, etc.

Tribal Nations

Disinfecting fire stations, casinos and public buildings

Rental Car Companies

Disinfecting vehicles before and after use. It is safe to use on interiors of vehicles and on or around electronics. HOCL is most effective if used as a mist or fog. If surfaces are saturated, simply wipe off remaining product. Customers can conduct a small spot test on fabric before use.
